EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Marshall on July 28, 2005.

The application has been amended as follows:

- a. Please amend pages 10 and 11 of the specification as indicated on the attachments.
- b. In claims 1-40 of amended claims submitted 3/17/05, please present claim numbers before status identifiers.
- c. In **claim 20**, line 5, following the word "point," please insert - - where the means of anchoring said cable to said structure includes one or more spindle means - -.
- d. **Claims 22 and 38** are cancelled.
- e. In **claim 23**, please replace the number 22 with the number 20.
- f. In **claim 24**, please replace the number 22 with the number 20.
- g. In **claim 25**, please replace the number 22 with the number 20.
- h. In **claim 27**, please replace the number 22 with the number 20.
- i. In **claim 33**, following the word "structure" on the last line, please add - - at multiple points along said structure. —

- j. In **claim 33**, please insert the word - - of - - between the words "indication" and "said" on line 5.

Allowable Subject Matter

2. Claims 1-21, 23-37, and 39-40 are allowed. The following is an examiner's statement of reasons for allowance:

As for **claims 1-15**, the prior art of record fails to sufficiently describe or suggest a system for detecting a structure failure wherein a set of one or more spindles anchor a cable to the structure at intervals to ensure a break of the cable upon failure of the cable. These along with further limitations set forth, render claims 1-15 allowable over the prior art of record.

Regarding **claims 16-19**, there is no prior art that describes or suggests a system for detecting structural failure comprising a fiber optic cable coupled to the structure and a multitude of alarm indicator controllers and indicators. At least one of the controllers is located in the housing of at least one indicator. These along with further limitations set forth by the claims render claims 16-19 allowable over the prior art of record.

As for **claims 20-21 and 23-32**, the prior art of record fails to describe or suggest a system for detecting structure failure comprising a spindle means for anchoring a fiber optic cable to the structure and preventing the cable from slipping. These along with further limitations, render the claims allowable over the prior art.

Regarding **claims 33-37 and 39-40**, the prior art of record fails to sufficiently describe or suggest a method for detecting a structural failure comprising attaching a fiber optic cable to the structure so that it does not slip past fixed points. If the fiber optic cable breaks, an indication of a structural failure will be provided at multiple points along the entirety of the structure. These along with further limitations set forth by the claims render the claims allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
